The Royal Knot — Wedding Planning Management System

Comprehensive User Manual for All Four Sides: Client, Employee, Vendor, and Founder

Executive Overview & Philosophy

The Royal Knot is a bespoke, luxury wedding planning management platform built specifically for high-stakes destination weddings across Jaipur, Udaipur, and Jodhpur. Handling approximately 25 multi-crore royal celebrations per season—each spanning 3 to 4 days, 400+ distinguished guests, and 18+ luxury vendor categories—the platform coordinates all operations with cryptographic security, real-time live monitoring, and strict financial rigor.

This manual provides authoritative operational guidance for all four platform personas:

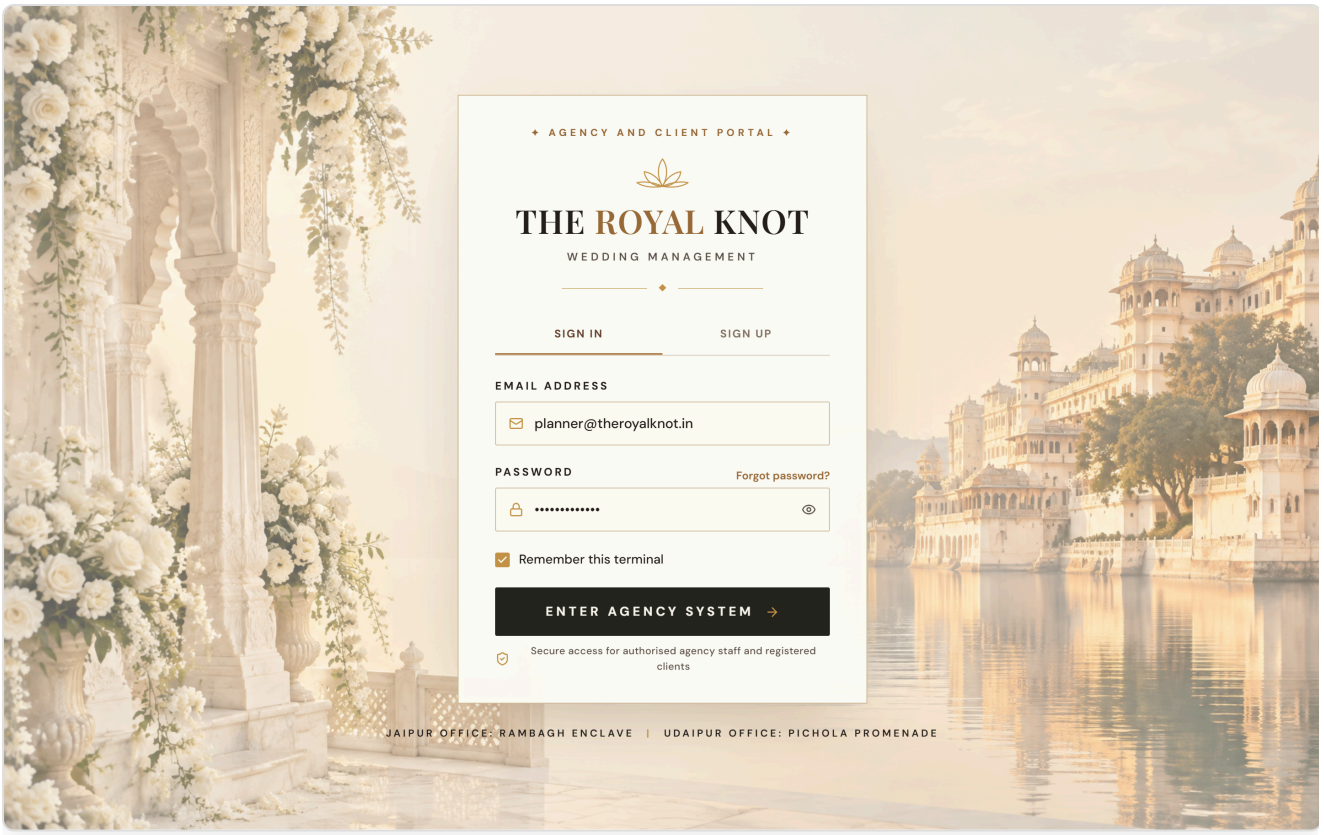

1. The Royal Couple (Client Portal)
2. The Wedding Planner & Team (Employee Operations)
3. The Luxury Vendor Partner (Vendor Portal)
4. The Agency Principal (Founder & Leadership Dashboard)
5. Not Available Yet

1. Client Guide — The Royal Couple

Welcome to your personalized royal wedding concierge. The Royal Knot protects your privacy and celebration vision while streamlining all administrative requirements.

1.1 Celebration Dossier Intake

Upon receiving your private invitation, you are guided through our Celebration Intake portal (`/client-intake`). Here, you register your partner details, ceremony dates, guest estimations, and royal palace preferences (e.g., Jagmandir Island, Taj Lake Palace, Umaid Bhawan Palace).

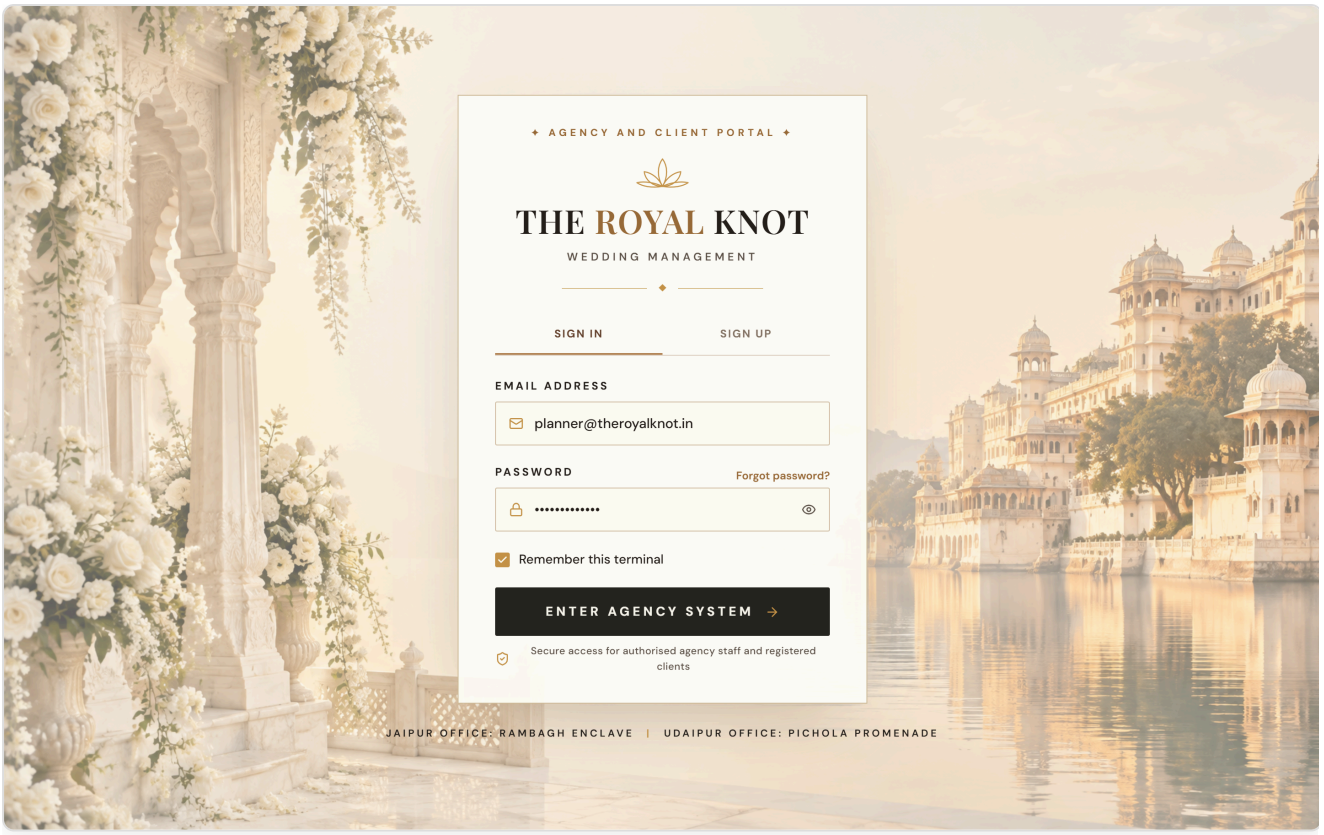

Key Client Actions:

- Verify partner names, contact telephone, and primary email address.
- Select your target ceremony dates across Mehendi, Sangeet, Vedic Mandap, and Reception.
- Detail royal heritage themes (e.g., "Floating Palace Splendor", "Regal Rajputana Procession").

1.2 Secure Agreement Signing Gateway (`/agreement`)

To protect both the couple and palace bookings, our platform enforces a strict Agreement Gate. Until the Service Agreement is digitally executed, vendor directories and operational contracts remain locked.

Two-Factor OTP & Digital Signature Process:

1. **One-Time Password (OTP):** Click **Send Verification Code**. An authentic 6-digit OTP is dispatched to your registered email and mobile number (10-minute validity, maximum 5 attempts).
2. **Verification:** Enter your code and click **Verify OTP**.
3. **Digital Signature Canvas:** Use your finger or stylus on mobile/tablet, or mouse on desktop, to digitally execute your signature.
4. **Execution Audit:** Check the agreement confirmation checkbox and tap **Digitally Sign Agreement**.
5. **Cryptographic Certificate:** An audit-trail PDF is generated with SHA-256 integrity hashing, timestamp, IP address, and user agent. The document is instantly archived, and all celebration planning areas unlock.

1.3 Client Wedding Overview (Read-Only)

Once executed, couples access their read-only Celebration Overview (`/api/v1/projects/{id}/client-overview`):

- **Ceremony Timeline:** Visual chronological view of Mehendi, Sangeet, Baraat, and Reception.
- **Planning Progress:** Task completion percentages across Venue, Design, and Catering.
- **Confirmed Luxury Vendors:** Curated directory of confirmed palace partners and contact concierges.
- **Payment Ledger:** Clear record of paid booking retainers, upcoming advances, and final balances.

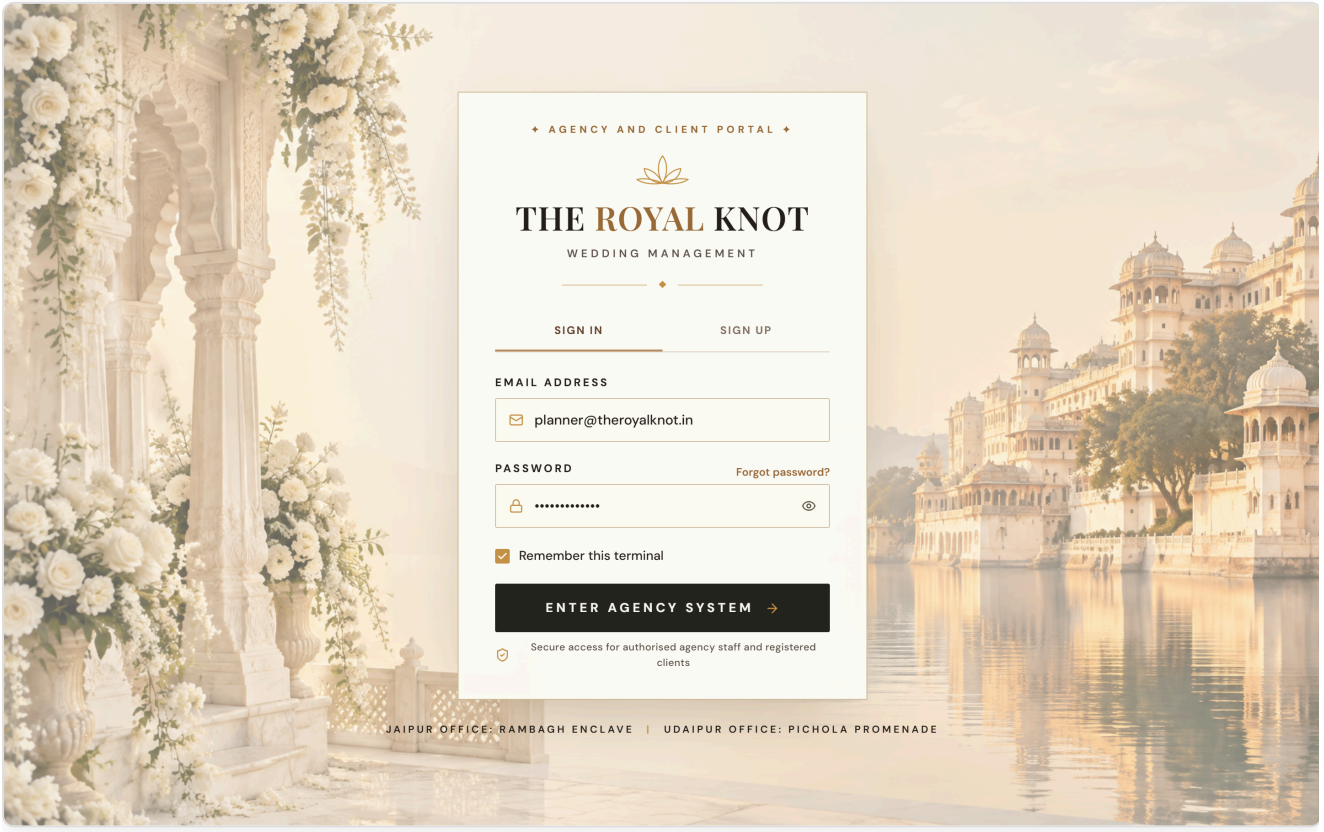

---

2. Employee Guide — Wedding Planners & Coordinators

Agency staff oversee the complete operational lifecycle from initial enquiry to final reconciliation.

2.1 Enquiry Intake & Qualification (`/enquiries`)

All inbound prospective couples arriving via email, direct website intake, or Google Forms appear in the central Enquiries Workspace (`/enquiries`).

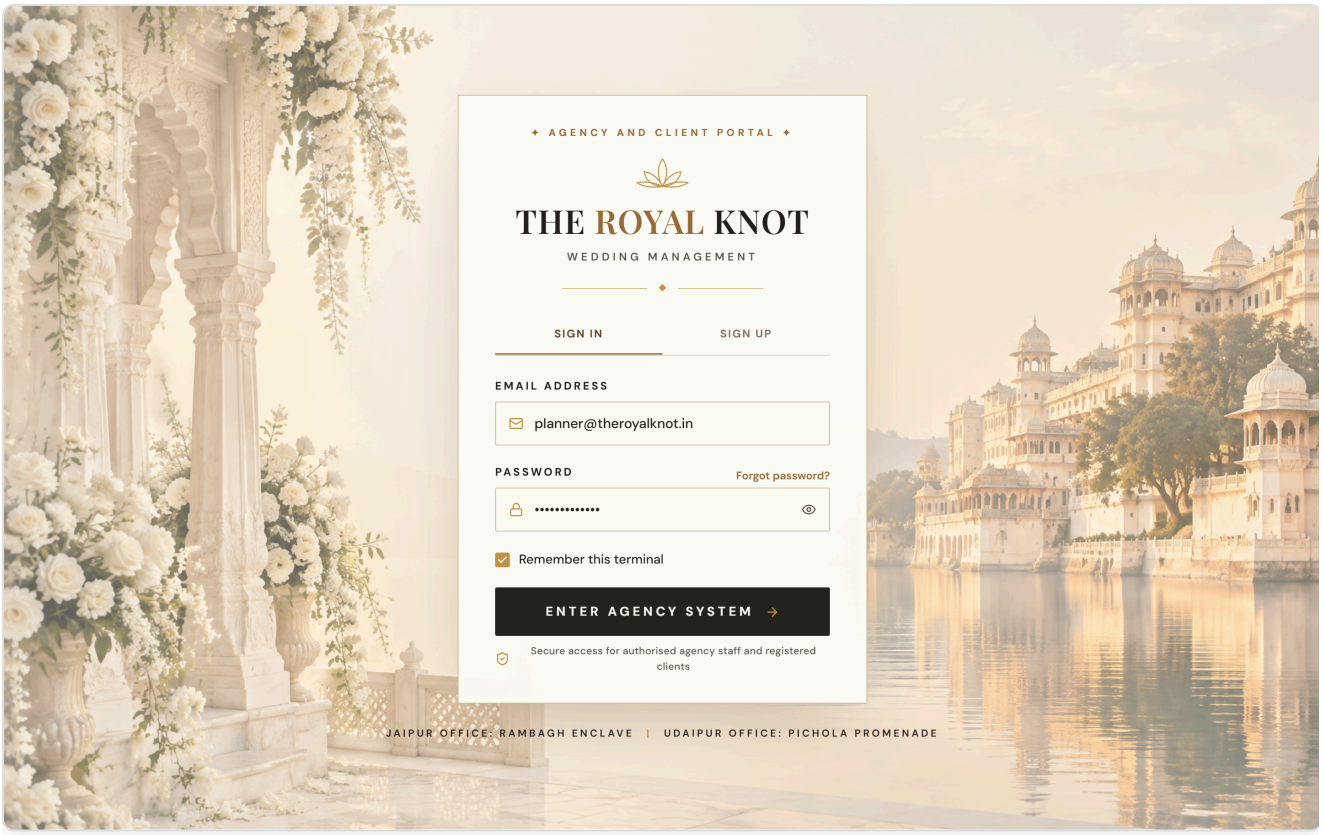

Operational Steps:

- Review requested celebration dates, estimated guest counts, and multi-crore budgets.
- Assign lead planners (e.g., Maharani Gayatri Singh, Raghav Sharma).
- Advance lifecycle status from `Enquiry Received` through `Registration Document Sent` to `Confirmed` .

2.2 Operational Weddings Portfolio (`/weddings`)

The core workspace lists all active destination celebrations across Rajasthan.

Key Information Monitored:

- Project Code (e.g., `PRJ-2027-HERO`, `PRJ-2026-LIVE`).
- Hub Location (Taj Lake Palace Udaipur, Rambagh Palace Jaipur, Umaid Bhawan Jodhpur).
- Current Operational Stage (`Planning`, `Execution`, `Completed`).
- Booking Deposit Status (`Paid` / `Pending`).

2.3 Deposit Payment & 28-Task Plan Generation

When the client booking deposit (25% retainer) is recorded:

1. Navigate to the project details and tap **Mark Deposit Paid** (`POST /api/v1/projects/{id}/deposit-paid`).
2. **Automated Plan Generation:** The system generates 28 specialized tasks (for Full-Service) or 25 tasks (for Partial) covering:
    - **Venue:** Palace permits, heritage authority NOCs, guest suite block allocations.
    - **Design & Florals:** Mandap structural engineering, royal fabrics, floral fragrance schemes.
    - **Catering:** Silver-platter degustation menus, royal thali tastings, late-night chaat counters.
    - **Ceremonies:** Mehendi artists, Sangeet choreography, Baraat elephants/vintage fleet, Vedic Pheras.
3. **Payment Milestones:** Automatically establishes 3 contractual payment stages:
    - **Stage 1 (Retainer):** 25% marked Paid upon deposit.
    - **Stage 2 (Advance):** 40% due exactly 30 days prior to wedding date.
    - **Stage 3 (Final Balance):** 35% due 3 days post-event.
4. **Idempotency Guarantee:** Re-triggering the deposit payment action will never duplicate tasks or milestones.

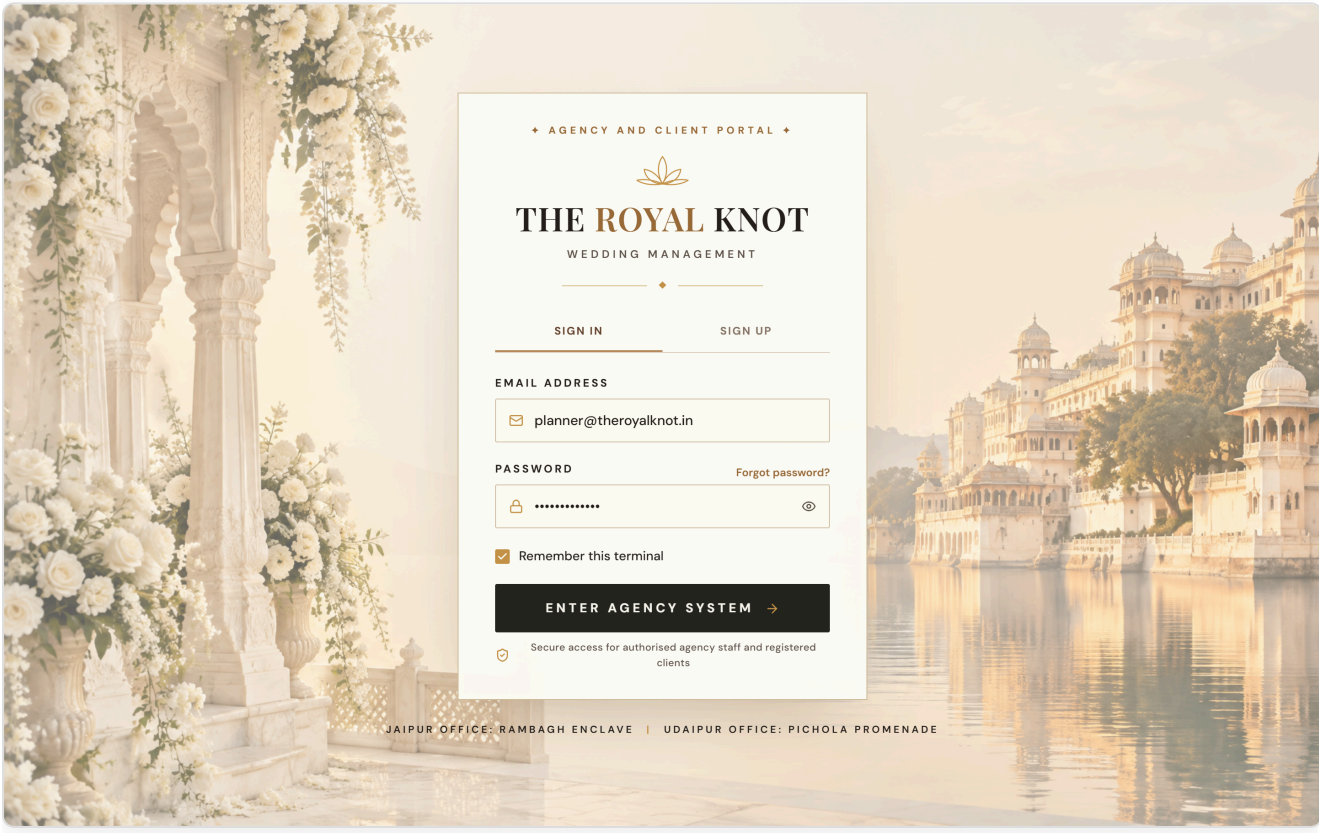

2.4 Caterer RFQ & Side-by-Side Quotation Comparison

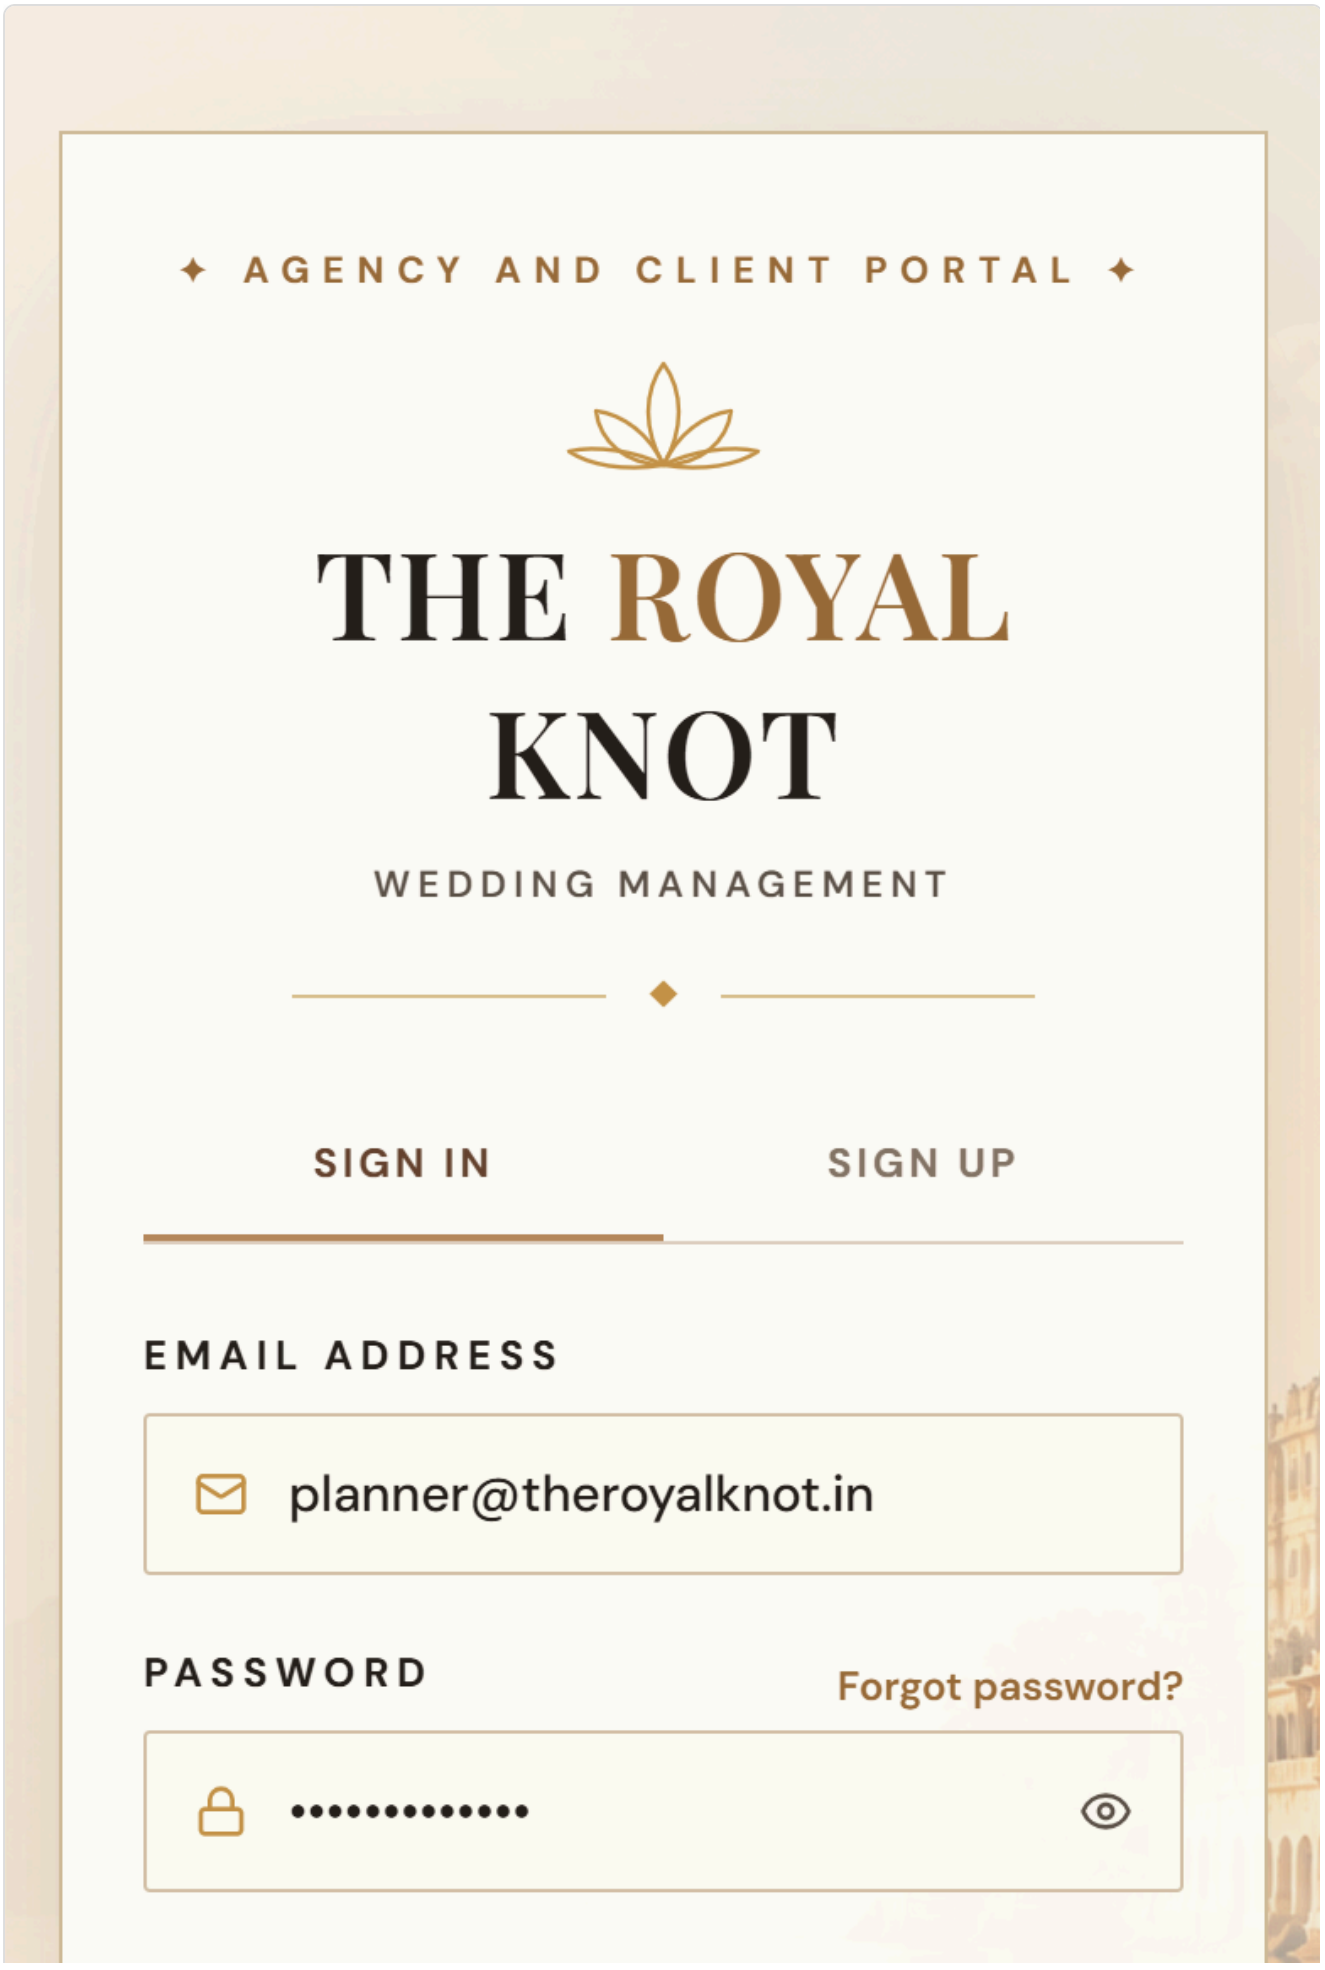

For food and beverage planning, the agency dispatches RFQs to multiple luxury caterers:

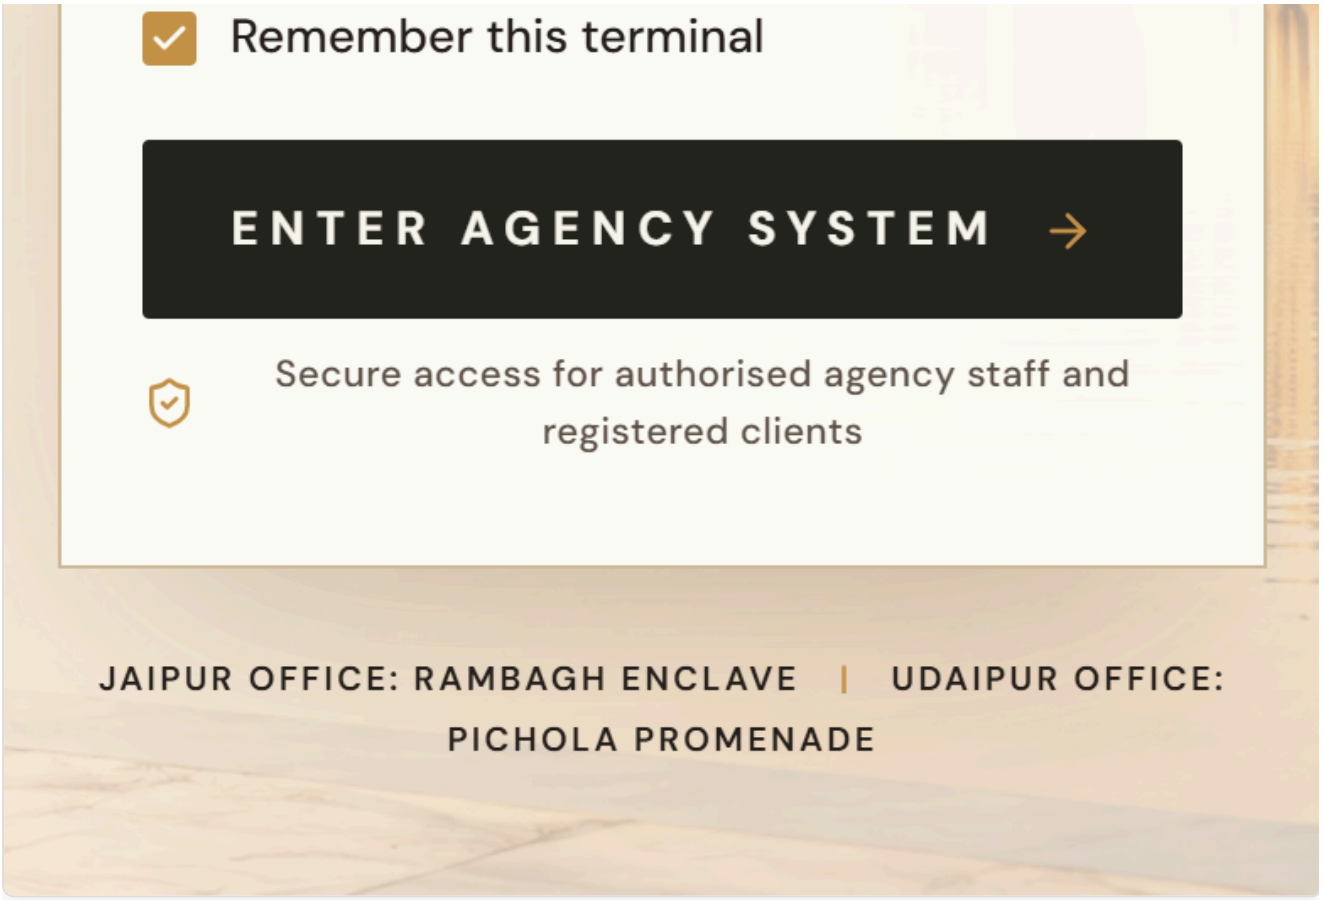

1. Open the function catering module (`/api/v1/projects/{id}/functions/{func_id}/catering`).
2. Dispatch RFQs to multiple vendors (e.g., Mewar Royal Caterers, Rajputana Feasts, Udaipur Heritage Kitchen).
3. Review submitted bids via **Side-by-Side Compare** (`GET /api/v1/catering/{id}/quotations/compare`).
    - Normalizes food pricing, equipment charges, and 18% GST into a true **Price-per-Plate**.
    - Automatically highlights the lowest cost per plate.
4. **Atomic Winner Selection:** Selecting the winning caterer executes an atomic database transaction that:
    - Transitions winning quote to `Accepted` .
    - Transitions competing quotes to `Closed` .
    - Binds the winning caterer to `project_vendors` with locked contract pricing.

2.5 Big Day Live Coordinator Schedule (`/weddings/:id/big-day`)

On celebration day, ground coordinators manage the event timeline with live 30-second polling and real-time late detection.

Live Timeline Features:

- **Real-Time Dynamic Late Engine:** An event is dynamically flagged **LATE** whenever current wall-clock time exceeds `expected_arrival_time + grace_period_minutes` and vendor has not arrived.
- **One-Tap Check-In:** When vendor enters the palace gate, tap **Check-In**. Arrival timestamp is stamped, and late alert clears immediately.
- **Mobile-First Layout:** Designed for coordinators moving through palace corridors with filter pills (`All` , `Pending` , `Arrived` , `Late`).

2.6 Settlement Extras & Idempotent Vendor Payouts

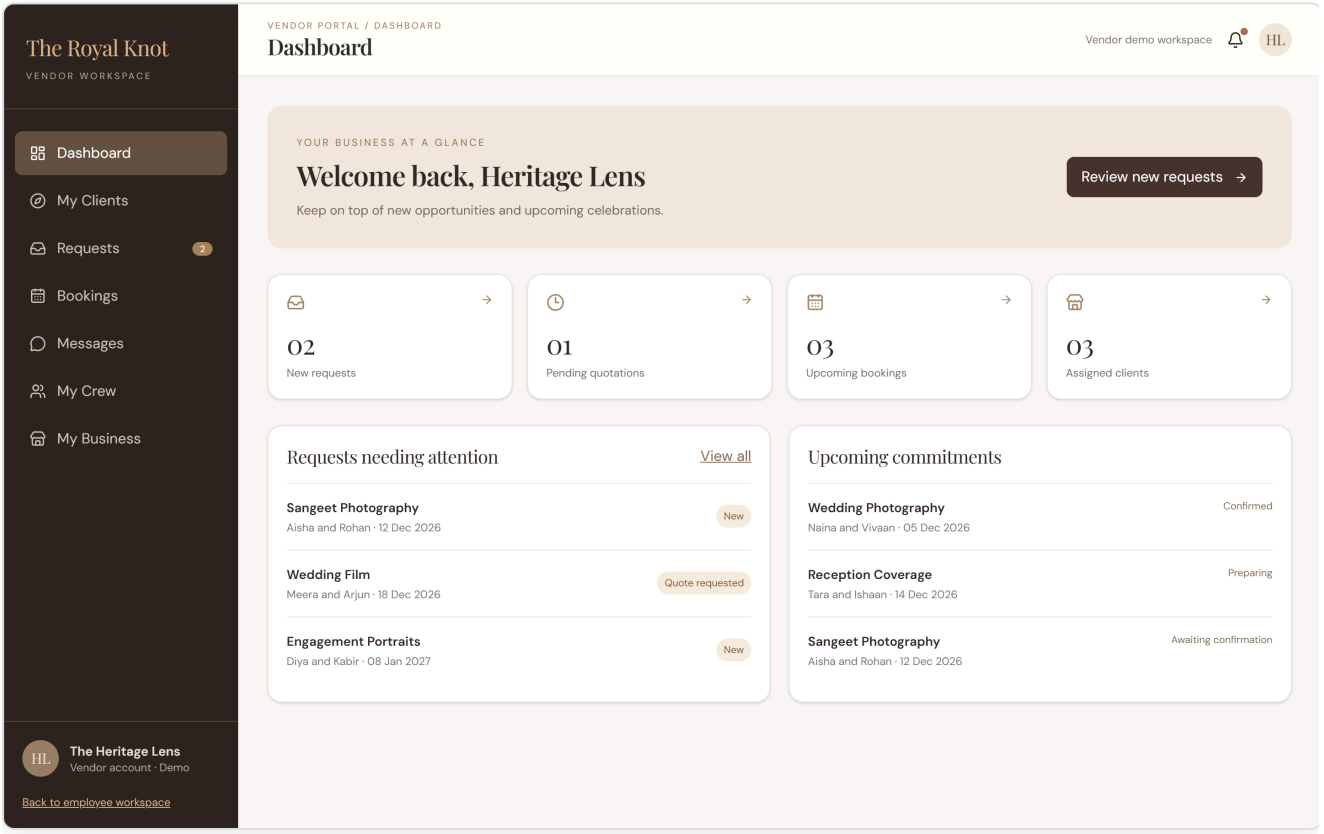

During and after the wedding, operational adjustments are captured cleanly:

1. **Logging Extras:** Record extra plates or overtime (e.g., 60 Extra Gala Dinner Plates, DJ 2 Hours Overtime). Extras are flagged for client invoicing.
2. **Vendor Payout Computation:** $$\text{Final Payout} = \text{Agreed Contract Amount} + \text{Approved Extras} - \text{Advances Deducted}$$
3. **Idempotency Key:** Payouts are generated with strict uniqueness keys (`PAYOUT-{project_id}-{vendor_id}`). Submitting a duplicate payout request is rejected with HTTP 409 Conflict.

---

3. Vendor Guide — Luxury Trade Partners

The Royal Knot Vendor Portal (`/vendor-portal`) allows catering chefs, decor designers, musicians, and fleet operators to collaborate transparently.

3.1 Authentication

Vendor representatives sign in using their registered trade email, phone number, or authorized contact person name.

3.2 Reviewing Assigned Celebrations & RFQs

Once authenticated, the dashboard displays:

- **Assigned Weddings:** Celebrations where your firm is contracted.
- **Incoming RFQs:** Requests for quotations with guest counts, service styles, and dietary parameters.
- **Contract Performance:** Scorecards displaying ratings, on-time arrivals, and total contract volume.

3.3 Submitting Itemized Quotations

Vendors submit itemized quotes with clear breakdowns:

- Base per-person rate (food cost).
- Royal service style (Silver Platter, Royal Buffet, Live Stations).
- Ancillary equipment and logistics fees.

- Applicable GST taxes (5% or 18%).
- Itemized menu courses (Shahi Starters, Main Course, Royal Desserts).

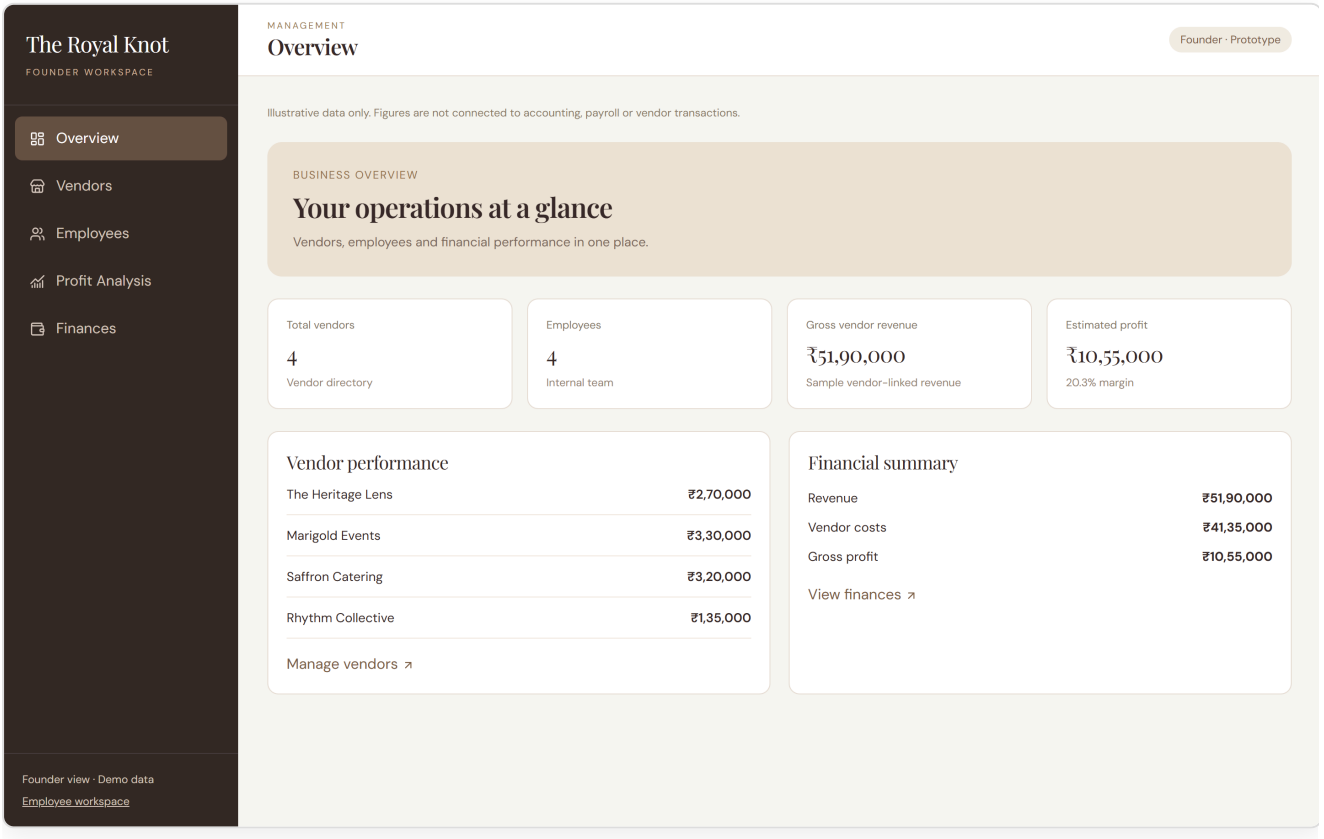

3.4 Status Progression

- `Received` $\rightarrow$ Submitted and logged in agency review queue.
- `Under Review` $\rightarrow$ Under evaluation alongside competing proposals.
- `Accepted` $\rightarrow$ Winning bid selected; contract binding.
- `Closed` $\rightarrow$ Competing proposal closed gracefully for the function.

---

4. Founder Guide — Executive Oversight & Season Radar

The Founder Portal (`/founder-portal`) equips agency leadership with season-wide portfolio control and financial governance.

4.1 Season Financial Dashboard

Aggregates performance across the entire 25-wedding season:

- **Total Client Contracted Value:** Aggregate bookings value across Rajasthan.
- **Realized Cash Receipts:** Total booking retainers and stage advances banked.

- **Contracted Vendor Outflows:** Committed costs across palace venues, decor, catering, and production.
- **Internal Team Labor Burden:** Total planner and coordinator hours multiplied by hourly billing rates.
- **Founder Net Profit & Margin:** Clear net gross margin across all active and completed celebrations.

4.2 Four-Week Cash Flow Radar

Anticipates liquidity and upcoming dues over the next 28 days:

- Identifies client milestone payments coming due.
- Tracks vendor advance commitments before palace deadlines.
- Highlights days remaining to prevent calendar bottlenecks.

4.3 Vendor Reliability Scorecards

Ranks catering, decor, entertainment, and logistics partners based on:

- Punctuality rating on live Big Day check-ins.
- Quotation competitiveness and billing accuracy.
- Execution excellence across palace banquets.

4.4 Per-Wedding Profitability Engine

Calculates true gross profitability per wedding celebration: $$\text{Founder Gross Profit} = \text{Client Payments Received} - \text{Vendor Costs} - \text{Team Labor Costs}$$ *Sample Hand-Calculated Benchmark (Aarav & Meera Hero Wedding):*

- Client Payments Received: ₹3,54,00,000.00
- Vendor Contracted Costs: ₹2,02,75,000.00
- Team Labor Costs (310 hours): ₹18,00,000.00
- **Founder Gross Profit: ₹1,33,25,000.00**
- **Gross Profit Margin: 37.64%**

4.5 Shareable Expiring Executive Reports

To brief investors, royal family patrons, or co-founders:

- Tap **Generate Executive Report Link** (`GET /api/v1/founder/season-overview/export?token={token}`).
- Produces a secure, expiring tokenized HTML dossier rendering executive charts and cash flow metrics without exposing internal administrative access.

---

5. Not Available Yet

The following items are planned for future seasonal roadmaps and are currently unavailable:

- **Multi-Currency International Forex Client Wires:** Direct cross-border credit card or automated currency hedging (currently transactions are natively managed in INR).
- **Autonomous Drone Video Direct Ingest Feed:** Live video streaming from wedding drones directly into the Big Day coordinator dashboard.
- **Biometric Fingerprint Kiosks:** Hardware biometric scanning for palace service staff check-in (currently handled via coordinator mobile check-in buttons).
